Preface

This report on Morogoro Regional Gross Domestic Product (RGDP) highlights the trend of the region in terms of the Gross Domestic Product. The compiled estimates serve as a benchmark for future compilation of Morogoro RGDP. The report culminates the teamwork between the Office of RC Morogoro Region and the National Bureau of Statistics (NBS). It also presents the results of Morogoro RGDP at two levels namely district councils and Regional levels by activities. The Morogoro RGDP at current prices has been compiled for the years 2015, 2016, 2017, 2018 and 2019. This is a current report since 1997.

The office of RC through assigned regional professionals in various activities supervised data collection activity while the National Bureau of Statistics provided the experts for the compilation of the RGDP.

The compilation of RGDP approach used is consistent with international best practice. The methodology has been peer reviewed and endorsed by Economic Commission for Africa (ECA).

The Morogoro RDGP was compiled with the objective of providing a valuable stock of information on Regional GDP to the stakeholders that portrays the economic activities in the region. Further, the report proposes areas for improvements which stand as challenges to the Office of RC in Morogoro Region and the National Bureau of

Statistics in improving quality of the estimates. It is expected that the Report will be a useful reference material for all stakeholders.

Dr. Albina Chuwa,
Statistician General,
National Bureau of Statistics,

P.O. Box 2683, Dodoma

Tel. +255 26 2963822

Fax. +255 26 2963828

NBS would like to welcome comments regarding this publication. These comments should be channelled to the Statistician General, National Bureau of Statistics.

More National Accounts Statistics information are available through the following website

www.nbs.go.tz

Acknowledgements

Morogoro Regional Gross Domestic Product compilation was made possible by the joint effort of the office of RC, NBS and Councils. The work was headed by Morogoro Regional Commissioner Hon. Martine Shigella under the coordination of Regional Administrative Secretary Ms. Mariam A. Mtunguja, Assistant Administrative Secretary - Planning and Coordination Mr. Anzaamen L.D Ndossa, Regional Statistician Mr. Erick A. Ulomi and Regional Statistical Manager Mr. Charles Mtabo who supervised data collection process.

The Regional Commissioner appreciates the Council Directors from Kilosa DC, Morogoro DC, Mlimba DC, Ulanga DC, Morogoro MC, Mvomero DC, Gairo DC, Ifakara TC and Malinyi DC and other Council officials who coordinated the data collection. The Region also appreciates the respondents, public and private institutions for their cooperation in provision of data for the preparation of Regional Gross Domestic Product.

The RC's office also, acknowledges the team from the NBS led by National Accounts Statistics Manager, Mr. Daniel Masolwa and Mr. Ernest E. Mshana for their technical inputs.

Hon. Martine Shigella
Regional Commissioner

1.0 Introduction and Background

The Morogoro Regional Gross Domestic Product report is the outcome of the teamwork between the National Bureau of Statistics and the Morogoro Regional Commissioner's Office. The process of compiling the report started in October 2020 with a training workshop on the compilation methodology, data collection techniques and work plan at Mikumi Town. The working arrangement was as follows:

- Regional Commissioner's Office responsibility was to coordinate and supervise data collection exercise on all sectors of the regional economy; and
- The National Bureau of Statistics prepared questionnaires for data collection and develop sampling frame before draw a representative sample for the survey as well as offering technical expertise on the GDP compilation.

2.0 Main Objective

The main objective of Morogoro Region GDP estimates is to provide a vital economic indicator that is used as an input in planning for the regional development programs. It is anticipated that, the compiled Morogoro regional GDP will improve the Regional and District planning processes and evidence-based decision-making.

2.1 The Specific Objectives

The specific objectives for the compilation of Morogoro Regional GDP estimates were:

- (a) To compile Morogoro Regional GDP estimates by economic activity; and
- (b) To calculate per capita GDP at regional and districts level.

3.0 Benefits of the Morogoro Regional GDP

The Regional GDP compilation activity provides essential data to regional development policy because they:

- a) Help to achieve a greater understanding of the growth and innovation of the regional performance;
- b) Provide a sound basis for monitoring and evaluation of economic development trends;
- c) Support central government's ability to target regional development programmes, including further development and implementation of FYDP and SDGs at both regional and district levels;
- d) Provide a more robust basis for economic decision-making by region, districts and the private sectors;
- e) Provide effective information base for public debate and community understanding of regional economic development;
- f) Provide benchmark data that will help to address specific issues such as poverty reduction and industrialization (processing units of agricultural products into integrated producer schemes);
- g) The data will explore and serve as a catalyst in scarce resource allocation and investment at regional and district levels; and
- h) Open economic ventures by sectors and draw attention for technical know-how, movements and integrated industrialization process in the region.

4.0 Scope and Coverage

Morogoro regional and council's administrative boundaries have been treated as an economic territory for the regional and district GDP estimates within which transactions of goods and services take place.

Morogoro Regional GDP estimates are on an annual basis covering the years 2015, 2016, 2017, 2018 and 2019. The timeframe for future production of the series has to be established between the NBS and the Morogoro Regional Secretariat.

Morogoro Regional GDP has been compiled by economic activities. Sixteen economic activities break down is available, based on the national accounts activity classification. Due to the application of confidentiality rules, it is often difficult to provide estimates at a greater level of detail. The sixteen economic activities in the regional GDP estimates are:

- a) Agriculture, Forestry and Fishing:
 - i. Crops;
 - ii. Livestock;
 - iii. Forestry;
 - iv. Fishing;
- b) Mining and quarrying;
- c) Manufacturing;
- d) Electricity;

- e) Water;
- f) Construction;
- g) Wholesale and Retail Trade; Repairs,
- h) Accommodation and Food services;
- i) Transport, Storage and Communication;
- j) Finance and Insurance;
- k) Real Estate;
- l) Professional, scientific and technical activities;
- m) Public Administration;
- n) Education;
- o) Human Health and Social Work; and
- p) Other Social and personal services.

5.0 Methodology

5.1 Regional GDP measurement approaches

This section discusses the broad methodology used to derive the regional GDP estimates.

The internationally preferred approach for regional GDP compilation is to directly measure the local activity of establishments and build up regional accounts from this information. The establishments level compilation approach is preferred, as it directly measures value-added. This approach is also useful analytically since it clearly links the activities of establishments within a region. The Morogoro Regional GDP has based on this approach where possible, and it has been used for most activities.

Morogoro Regional GDP estimates were compiled using national accounting concepts. NBS aspires to produce regional estimates that are consistent with the published national accounts. In other words, the sum of the regional GDP equals national level GDP.

5.2 Bottom-up Approach

The method of building up regional estimates from local enterprise data is known as the ‘bottom-up’ approach. The bottom-up approach requires detailed data on the activities undertaken. The Office of RC Morogoro region organized data collection undertaking to produce the

required data for compilation of RGDP estimates as outlined in Table 4.

5.3 Top-down Approach

The ‘top-down’ approach is an alternative method used for allocation of national level GDP estimates to regions by using the derived weights from respective regions. This approach is used if the bottom-up approach cannot be implemented for economic activities. This is usually due to lack of survey data from respective activities.

5.4 Compilation Procedure

The compilation of the estimates was done in accordance with the recommended procedures in the System of National Accounts (SNA); the administrative demarcated area called “Morogoro Region” is the economic territory for the compilation of the regional GDP estimates.

5.5 Measuring Gross Domestic Product

This section discusses the concept of GDP and how it is applied in Morogoro Regional GDP estimates. The technical terms used are contained in Concepts and Definition (Annex 1), including all definitions of components of GDP, and terms such as value-added etc.

5.6 Regional GDP Compilation.

The overall regional GDP estimates is based on activity estimates for value-added (the value of output after the cost of bought-in materials and services have been deducted). The output is valued inclusive of taxes on production and subsidies consistent with the national accounts. The treatment of GDP is also consistent with the national approach.

The components of the alternative approach of measuring GDP include:

- a) Compensation of employees;
- b) Consumption of fixed capital;
- c) Gross operating surplus;
- d) Subsidies; and
- e) Taxes on production.

6.0 Key findings and Analysis

6.1 Key findings of the Morogoro Regional GDP

The overall Regional GDP at Current Prices for 2019 was TZS. 6,779.5 billion;

- a) The Morogoro Regional GDP for the year 2019 shows that Kilosa District Council had the highest GDP of TZS. 1,441 billion while Morogoro District Council had the lowest GDP in the region of TZS. 134 billion.

Chart 1: Morogoro Regional GDP in Billion at Current Prices by District Council for the year 2019

Source: National Bureau of Statistics

b) The percentage share to the Morogoro Regional GDP by the District Council for the year 2019 depicts that Kilosa District Council had the highest share of 21.3 percent while Morogoro District Council had the lowest share of 2.0 percent as shown in the chart 2 below.

Chart 2: Percentage Share of the Morogoro Regional GDP by District Council for the year 2019

Source: National Bureau of Statistics

Per Capita GDP at current prices for Morogoro region was TZS. 2,546,331 for the year 2019, which is a little bit lower than National per capita GDP of 2,573,324. However, five district councils had per capita GDP higher than national per capita GDP (Annex 1: Table 2).

c) Ulanga District Council had the highest per capita of TZS. 5,954,238 while Morogoro District Council had the least per capita GDP of TZS. 398,049,256 for the Year 2019.

Chart 3: Morogoro Region Per Capita GDP at Current Prices by District Council for the year 2019 in Tanzanian Shillings

Source: National Bureau of Statistics

6.2 Analysis of the Morogoro Regional Economic Activities

For the year 2019, agriculture activity shares to GDP accounted to 67.7 percent while service share to GDP accounted to 17.2 percent. This implies that, agriculture is a predominant activity in the region.

Industry and Construction share to GDP accounted for the least at 15.1 percent for the year 2019 (Chart 4).

Chart 4: Major Sector's contribution to Regional GDP, 2019

Source: National Bureau of Statistics

Kilosa District council had a largest share on agriculture activity of 23.1 percent for the year 2019, while Morogoro District Council had the least share of only 0.4 percent.

Chart 5: Agriculture Activity Share by District Council, 2019

Source: National Bureau of Statistics

The industry and construction activity share by districts shows that, Morogoro Municipal Council had the highest contribution of 36.5 percent for the year 2019 while Malinyi District Council contributed the least of 3.0 percent.

Chart 6: Industry and Construction Activity Share by District Council, 2019

Source: National Bureau of Statistics

Note: The industry and construction activity include; Mining, Manufacturing, Construction, Electricity and Water Supply.

For the same year, service activity share by district councils depicts Morogoro Municipal Council to contribute most of 41.2 percent in the region while the least share of 3.1 percent was accounted by Malinyi District Council.

Chart 7: Distribution of Service Activity Share by District Council, 2019

Source: National Bureau of Statistics

7. Challenges and the Way Forward

Among the challenges facing the Region is poor recording or completely missing of some production and expenditure data from economic activities. Little knowledge on the importance of keeping up statistics data to some of the respondents. Also, difficulty of data provision, to fear TRA estimates.

Based on the report findings, the following areas are recommended for improvements:

- a) Morogoro GDP has been compiled for the first time since 1997 as such it is a baseline picture for the preceding GDP compilation for Morogoro region;
- b) Many districts, especially the less diversified ones can be highly affected by short-term events such as price increase and climatic conditions. To identify which district is growing faster than the rest, a much longer-term time series would be required before any such conclusion could be reached;
- c) The GDP at constant prices for the region need to be investigated more in terms of prices used;
- d) The dissemination of the findings is vital for incorporating comments for improving regional GDP;
- e) Initiation of statute merger ventures whereby district councils having statutory obligation in forming economic partnerships through shares with/and/or stakeholders/villages in liberalization of subsistence economy, opening employment opportunities; and thereby raising contribution to the general economic growth; and
- f) Refreshers course for data collectors should be done to ensure Quality of data maintained for sound socio-economic planning and sustainable development.

- g) To create awareness for the data collection to citizens, public and private sector through advertisements.
- h) Councils to budget and allocate fund for the data collection exercise in order to ensure data is collected on time.

Annex 2: Concept and Definitions

National Accounts definitions

Basic price

The amount receivable by the producer from the purchaser for a unit of a good or service produced as output minus any tax payable, and plus any subsidy receivable. It excludes any transport charges invoiced separately by the producer.

Compensation of employees

This is total remuneration, in cash or in kind, payable by enterprises to employees. Includes contributions paid on employees' superannuation funds, private pension schemes, the Accident Compensation Corporation, casualty and life insurance schemes, and other fringe benefits.

Consumption of fixed capital

This represents the reduction in the value of the fixed assets used in production during the accounting period resulting from physical deterioration, normal obsolescence or accidental damage. It is valued at replacement cost.

Gross Domestic Product (GDP)

The total market value of goods and services produced after deducting the cost of goods and services utilised in the process of production, but before deducting allowances for the consumption of fixed capital.

Gross Domestic Product (GDP) at current prices

Gross domestic product (GDP) at current prices is GDP at prices of the current reporting period. Also known as nominal GDP.

Gross Domestic Product (GDP) at constant prices

Gross domestic product (GDP) at constant prices refers to the volume level of GDP. Constant price estimates of GDP are obtained by expressing values in terms of a base period.

Gross operating surplus

This residual item is output at producer's values, less the sum of intermediate consumption, compensation of employees, and taxes on production and imports net of subsidies. It is approximately equal to accounting profit before the deduction of depreciation, direct taxes, dividends, and interest paid and bad debts, and before the addition of interest and dividends received.

Intermediate consumption

This is the value of non-durable goods and services used in production. Valuation is at purchaser's values.

Output

Output consists of goods and services produced within an establishment that become available for use outside that establishment, plus any goods and services produced for own final use.

Producer values

The equivalent of purchaser values (see below), reduced by the trade and transport margins for delivering the items from producer to purchaser. This effectively gives the market sales value for the producer at the factory door, farm gate, mine head, and so on. For services, the producer value is the same as the purchaser value, as services are produced and consumed at the same time.

Purchaser values

This is the costs in the market of goods and services on delivery to the purchaser. For services, the purchaser value is the same as the producer value, as services are produced and consumed at the same time.

Subsidies

Current unrequited payments made by governments to enterprises based on the levels of their production activities or the quantities or values of the goods and services they produce, sell or import.

Taxes on production and imports

Taxes assessed on producers in respect of the production, sale, purchase and use of goods and services, and which add to the market prices of those goods and services. This includes sales tax, local authority rates, import and excise duties, fringe benefits tax, and registration fees, such as motor vehicle registration, paid by producers.

Value-added

The value added to goods and services by the contributions of capital and labour (i.e. after the costs of bought-in materials and services have been deducted from the total value of output).

Establishment

An establishment is an enterprise or part of an enterprise that is situated in a single location and in which only a single productive activity is carried out or in which the principal productive activity accounts for most of the value added.
